## Energy Policy

Our energy policy focuses on minimization of energy consumption, maximum use of renewable energy and creation of energy conservation awareness. Energy usage and its impact on the environment are measured. CO2 emissions generated by our Vehicles are get counted. To reduce local air pollution emissions environment-friendly vehicles, including bicycles, public transportation are preferred and pedestrian-friendly roads are also used. Generally photovoltaic solar panels, LED bulbs are used. Institute is having focus on systematic waste management mechanism.

Institute is having rainwater harvesting unit. Tree plantation drive is also carried out. Institute encourages use of advanced technology to minimize energy consumption, atmospheric emissions and noise, particularly from our vehicle fleets. Institute tries to strengthen employees' and students' environmental knowledge and skills in order to improve our own environmental performance through various training programmes
