Waste Management Policy

Institute implements a proper waste segregation system across the campus. Separate bins or containers for different types of waste, such as organic, recyclable, non-recyclable, and hazardous waste are used. Awareness programs to educate students, staff, and faculty on the importance of waste segregation are conducted. To minimize waste generation, institute encourages the use of digital resources, double-sided printing, and reusable items such as water bottles and coffee cups and also inculcate a culture of reducing waste at the source and reusing materials wherever possible.

Recycling initiatives of the institute are to set up recycling stations throughout the campus to collect paper, plastic, glass, and other recyclable materials. With the help of waste management companies institute ensures proper disposal and processing of recyclables. Regularly monitoring is done. Composting and E-waste management are also carried out. Regular awareness campaigns and workshops to educate the college community about waste management are run.
